## **SETTING CLOUD APPLICATION ENVIRONMENT**

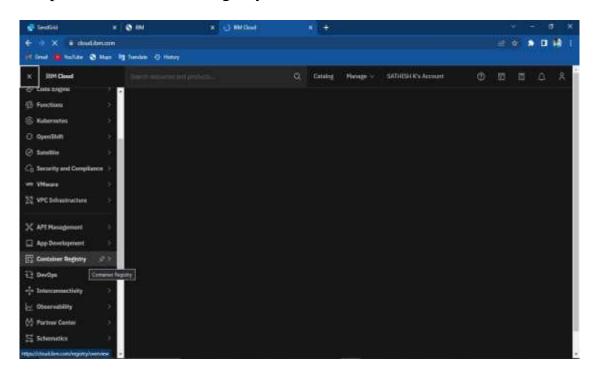

Team ID: PNT2022TMID43983

## IBM CLOUD CLI INSTALLATION

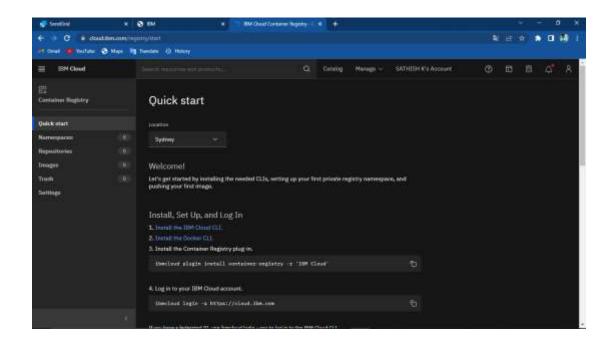

Step1: Log in to the IBM cloud

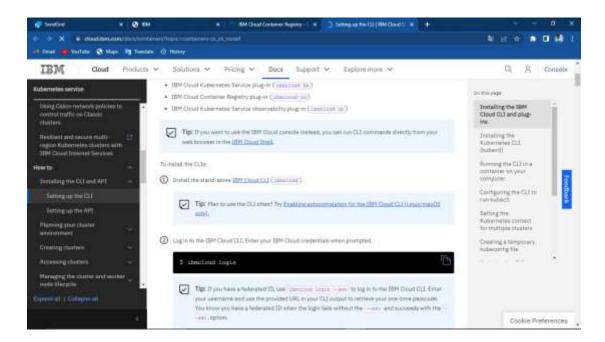

Step 2: Select container registry

Step3: Select Quickstart to open container registry and click on install IBM Cloud CLI

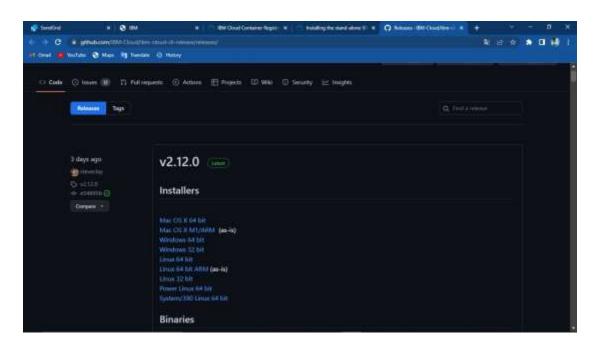

Step 4: Click on IBM Cloud CLI

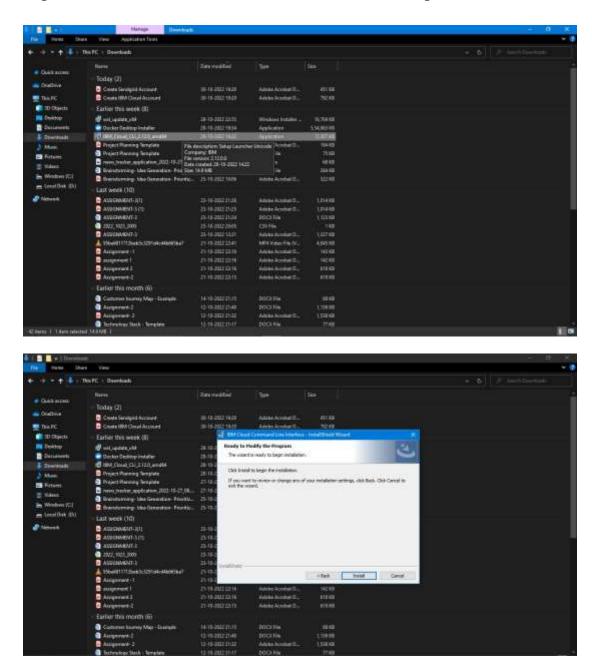

Step 5: Click on IBM Cloud CLI releases

Step 6: then GitHub page will open and download the IBM CLI installer by selecting as per your system required installer.

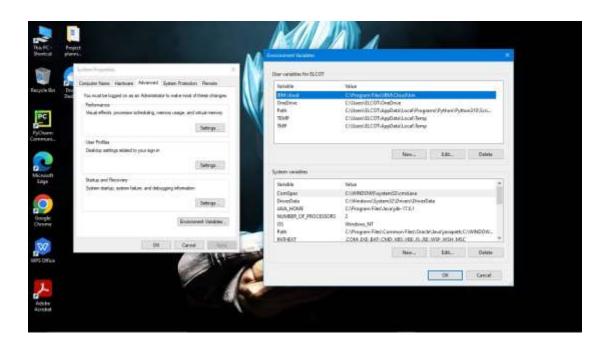

Step 7: After the download, Click the downloaded setup to run the installer

Step 8: After the installation set environment variable and then open CMD (Windows). Type this command to login in IBM cloud

"IBM cloud login"

In the variable name, name it as "IBM Cloud" and in variable value the path location of the IBM.

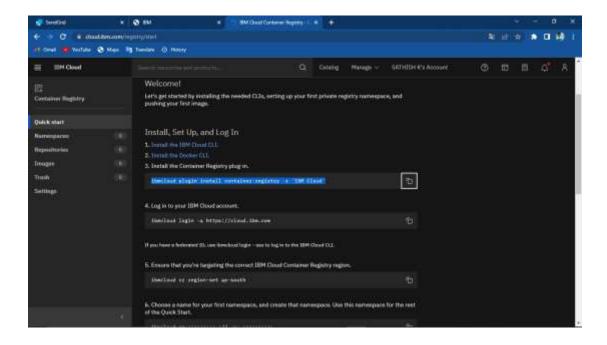

Step 9: Enter your IBM cloud email id and password, Then it will authenticate and signals "OK". The number of regions will displayed, select one of them for your targeted account.

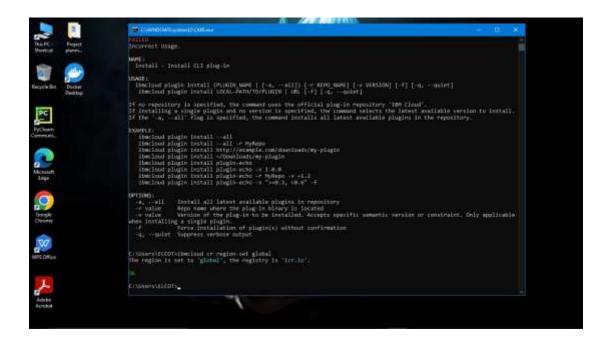

Step 10: Then copy the plugin command in your container registry (where the command displayed in your container registry which is opened on web browser) and paste and run it on cmd.

"IBM cloud plugin install container-registry -r"

Step 11: Set your region to global. "IBM cloud cr region-set global"

Step 12: Create namespace in your container registry
